More great footage of big props and vintage jets worldwide, from Caribbean Convairs and DC3s, to turboprops at Zurich or a ride on a CV880 at Miami.

There's some amazing rare colour film airside at Heathrow, with BOAC Argonauts, Hermes, Constellations and Stratocruisers.

Remember Convair 240s, DC4s and DC6s at La Paz, carrying meat from Bolivian farms? They're here.

Constellations continue with Aerotours and Air Cargo Support 1049s and Pan Am, TWA, Capital and CaribAir 749s.

What makes this programme so special is the amazing airside access. At times you're almost underneath DC6s, DC7s and Super Constellations!

There are DC6s in the colours of twenty different operators, seven with C46s, five with DC7s and various Martin 404s, Super Constellations, Electras, CL44s, DC3s and Convairliners.

Highlights include:

La Mancha Aire's magnificent DC7s in glorious close-up action.

Battered, oil-streaked Super Constellations nearing their final flights.

December to March is usually Salzburg's peak traffic season, when skiers and other winter holidaymakers arrive here from all over Europe. Back in January 2007/8, the ramp was full of charter flights and executive jets.

At that time, many ex-Soviet airlines were transitioning to western equipment and so there was a great mix of Tu154s and Yak 42s alongside 737s, 757s, etc, as well as a 707!

Hardly any of the airlines featured are still operating and, with very few exceptions, none are still flying the same aircraft. Thanks to Dave Ross, you can now catch all this long-gone action without catching a cold!
